CARDSONLINE

In response to the growing need for efficient and affordable management of campus cards and all card related activities, ScreenCheck offers CardsOnline, a card management system that measures up to the increasing demand to issue and manage multifunctional smart cards in an easy, controlled and cost efficient way.

CardsOnline takes a central role in the card production and -management of your organisation and will reduce costs at the same time. Especially when the campus cards are produced and used at multiple locations.

CardsOnline provides an unlimited number of locations and users who are able to create, produce and manage cards using a single online system. Advanced password access ensures protection of both users and data in the entire system.
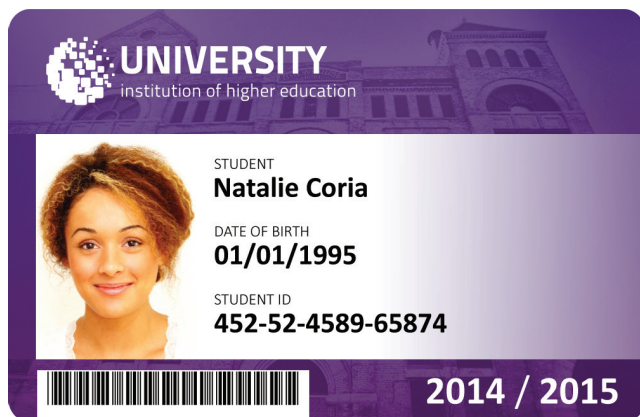

CardsOnline is your one card solution.

EFFICIENT, CLEAR AND COST-CUTTING

No longer a wallet full of different cards is required for entrance, registration, cash register and other applications. A single card can be used for all applications. Use the card to grant access to buildings and parking spaces, for printing and locker facilities. In addition, use the same card for payment at vending machines, or to pay for lunch at the canteen.

Printing, Encoding and Activation of a card can all be done with one print job in CardsOnline.
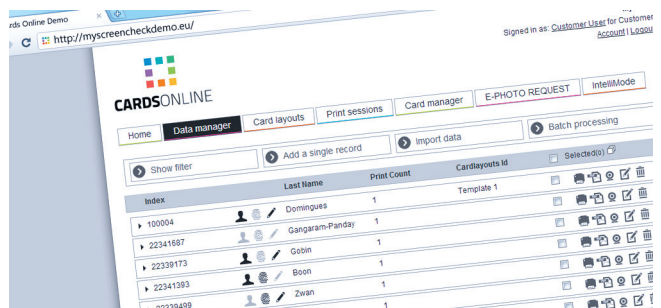

Card management becomes effortless with Cards-Online. Schedule automatic expiration, re-printing of cards or manage lost cards by blocking temporarily or permanently with just a couple of clicks. By using only one system for all functionalities, you save both time and cost, while simplifying your administration.

THE CARD PRODUCTION PROCESS

Produce campus cards in a couple of simple steps:

Step 1. Create a card design with our intuitive Card Designer.

Step 2. Import cardholders data automatically or add data to a datarecord manually.

Step 3. Add passport photos from Webcam or TWAIN sources using the photo capture tool with intelligent auto-capture and auto-cropping features.

Step 4. Batch print selected data records. Manage the inline encoding and printing process with the Card Print Manager. Easily encode all available data directly onto the card, without adding any steps to the production cycle: real inline encoding.

Step 5. Inform the connected facility applications about activation of the cards.

CardsOnline data manager overview

UNIQUE STRUCTURE

CardsOnline has a unique structure to optimize the work flow of your organisation. Featuring three levels for users, data and card management.

✅ ## HOST ADMINISTRATOR

Manage Groups and Group types for all individual parts of your organisation.

- ☐ Soap Data Agent
- ☐ Roles
- ☐ Languages
- ☐ Reports
- ☐ Look & Feel

✅ ## GROUP ADMINISTRATOR

Manage Units to organise your information and card designs.

- ☐ Ribbon Management
- ☐ CCI Encoding Files
- ☐ RSP/ISO number Range
- ☐ E-mail Management
- ☐ Print Sessions
- ☐ Card Term Settings

✅ ## UNIT OPERATOR

Manage cardholders data and card production

- ☐ Photo Capture/Upload
- ☐ Fingerprint
- ☐ Signature
- ☐ Card Designer
- ☐ Print Jobs
- ☐ Card Management
- ☐ Import XLS
- ☐ Manage Data Fields
- ☐ Batch Processing

CARD MANAGEMENT SYSTEM

CardsOnline becomes the link between the smart card and other systems (e.g. access control) in your organisation. Connections between these systems are established through custom made data agents and web services, defined by a data model at the start of each project.

CardsOnline interacting with databases, hardware and other applications.

WEBSERVICES & DATA AGENTS

Information from external systems such as HR-systems can be shared with CardsOnline using custom data agents. CardsOnline becomes your central point for managing data, and keeping everything synchronised from a single point of entry.

Changes or new card holder data can be managed and your connected facility applications are automatically updated.

FEATURES

- Cloud solution

- Centralised data management

- Connection to your databases

- Advanced user management

- Professional card design

- Import and export data

- Single or batch Printing

- Life cycle management of the card

THE CLOUD SOLUTION

CardsOnline offers a one card solution merging ID related systems & services into one card management and production interface. CardsOnline provides two setup options:

Local setup: CardsOnline is installed on the local network of a customer.

Cloud Solution: More and more people choose the CardsOnline Cloud Solution. It provides easy access through a web browser and only requires internet connection. So no local installation of the software, no maintenance of expensive infrastructure and knowhow. Always the latest features and functionality available. No high investment, just a monthly subscription fee covering all costs.
