# CardsOnline MyCloud

One powerful cloud platform offering multi-customer ID design, production & issuance

CardsOnline MyCloud is a cloud-based ID management platform for designing, issuing, and managing printed cards and Digital IDs. It combines badge design, data management, printing, and verification in one secure, hosted solution.

Organisations can quickly design badges, manage cardholder data, and print cards where and when needed. By integrating with HR systems, data is imported automatically through a Data Agent, reducing manual work and errors.

Built for growth and flexibility

With three powerful bundles: **Base**, **Professional**, and **Premium**, MyCloud makes it easy to match the right features to each customer. The platform supports natural upsell opportunities such as additional users, more Units, higher record capacity, Service Portal, Digital ID, and Status Check.

Why CardsOnline MyCloud

- **Multi-tenant & hosted**  
Ideal for multiple locations and customers
- **Live quickly**  
Hassle free and easy setup
- **Low setup costs**  
No heavy IT projects
- **Flexible & scalable**  
Grow via monthly bundles
- **Easy to demonstrate**  
Perfect alongside card printers and supplies

- Unlimited Card Designs
- Service Portal
- 1 Custom Status Check Template

Minimum contract duration  
1 month (tacit renewal)

### Digital ID

Available as a monthly add-on to any MyCloud bundle. Enables issuance of Digital IDs via Wallet Pass or Active ID.

## 1x Data Agent

Automatically import and update cardholder data via SFTP. The MyCloud Data Agent supports CSV and Excel files, ensuring your CardsOnline MyCloud environment stays accurate and current at all times.

## Data Manager

Manage all cardholder data effortlessly with the MyCloud Data Manager. Import or capture photos, add & update records, search instantly, print cards and issue Digital IDs, everything is streamlined in one intuitive dashboard.

## Card Designer

Design professional card layouts online using shapes, images, QR codes, dynamic text and logos. Create multiple designs, import BadgeMaker/CardStudio files, and use your own fonts for consistent branding.

Optional Digital ID layouts support both Wallet Pass and Active ID.

## 05

## 04

## Card Print Manager

The Card Print Manager (CPM) connects CardsOnline with your local printer and encoder, managing all print tasks. Installed on the printer's workstation, it ensures secure and efficient card production.

## Service Portal

Invite cardholders to securely upload their own photo using a self-service portal. This reduces manual work and speeds up the badge issuance process.

## 06

### Status Check

---

Status Check lets you instantly verify cardholder's information by scanning a QR code, on a printed card or Digital ID. Simply bind the data fields you want to validate and choose from standard or custom templates to check access rights, memberships, certifications, and more.

#### ScreenCheck

## 07 Optional:

### Digital ID

---

CardsOnline MyCloud lets you issue secure Digital IDs next to printed cards. With just a few clicks, cardholders receive their Digital ID by email and can instantly add it to their mobile device.

Digital IDs are available in two formats: Wallet Pass, compatible with the Wallet Pass app, and Active ID, available in the CardsOnline Active ID app.
