# CardsOnline MyCloud

With just one online platform, you can design, manage, and issue both printed and digital IDs with ease.

CardsOnline MyCloud is a powerful online platform that lets you design, manage data, print, and issue both ID cards and Digital IDs, all from one central environment.

Your organisation gets its own MyCloud account with online access to all the needed features.

Centrally manage cardholders data, and oversee card production and Digital ID distribution with ease, all from a single account, no complicated IT setup required. Empower your organisation with a modern, scalable solution for printing cards and issuing Digital IDs

Base, Professional or Premium

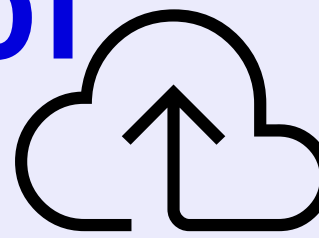

MyCloud is available in three bundles: **Base**, **Professional**, and **Premium**. This allows you to choose the bundle that best fits your needs, with the flexibility to upgrade later to a more advanced bundle with additional users, Units, increased record capacity, and extra functionality such as Service Portal, Digital ID, and Status Check.

Why Choose MyCloud

- **Cloud-Based**  
No need for local server installation
- **Quick to deploy**  
Up and running in a short time
- **Centralised Management**  
Suitable for multiple locations
- **Secure and Reliable**  
Hosted in a professional cloud environment
- **Scalable**  
Upgrade whenever you need more features

**01**

**Data Import**

MyCloud lets you import Excel files, so you can quickly and easily add multiple cardholder records at once.

**02**

**Data Manager**

Manage all cardholder data effortlessly with the MyCloud Data Manager. Import or capture photos, add & update records, search instantly, print cards and issue Digital IDs, everything is streamlined in one intuitive dashboard.

**03**

**Card Designer**

Design professional card layouts online using shapes, images, QR codes, dynamic text and logos. Create multiple designs, import BadgeMaker/CardStudio files, and use your own fonts for consistent branding.

Optional Digital ID layouts support both Wallet Pass and Active ID.

**05**

**Service Portal**

**04**

**Card Print Manager**

The Card Print Manager (CPM) connects MyCloud with your local printer and encoder, managing all print tasks. Installed on the printer's workstation, it ensures secure and efficient card production.

## 06

### Status Check

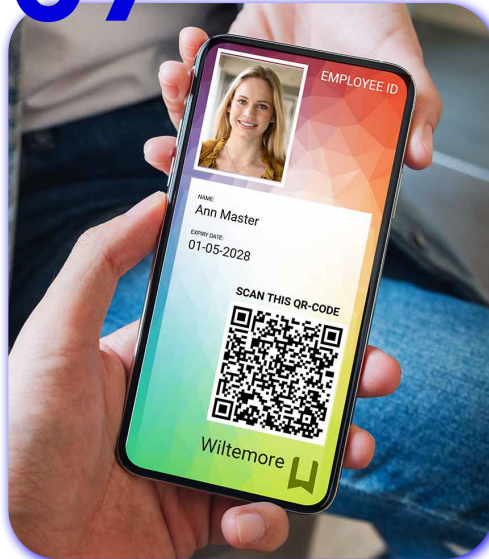

Status Check lets you instantly verify cardholder's information by scanning a QR code, on a printed card or Digital ID. Simply bind the data fields you want to validate and choose from the available templates to check access rights, memberships, certifications, and more.

#### ScreenCheck

Koraalrood 33, 2718SB  
Zoetermeer, The Netherlands

## 07 Optional:

### Digital ID

MyCloud lets you issue secure Digital IDs next to printed cards. With just a few clicks, cardholders receive their Digital ID by email and can instantly add it to their mobile device.

Digital IDs are available in two formats: Wallet Pass, compatible with the Wallet Pass app, and Active ID, available in the CardsOnline Active ID app.
